You see, I'm her brother." "Oh, she'll be surprised all right," said the woman. "But think of how surprised I am, I'm her mother!"

Understanding Grief...

Grief is a normal but sometimes overwhelming *emotion*. It is a response to the loss of someone or something that we have formed relationship or a bond with. There are many dimensions to this emotion that have impacts on our physical body, our cognitive functions, social interactions, and our spirituality. It is normal to find yourself feeling numb and removed from daily life, unable to carry on with regular duties while saddled with the sense of loss. Grief is both a universal and a personal experience. Individual experiences of grief vary and are influenced by the nature of the loss.

Experts advise those grieving to realize they can't control the process and to prepare for varying stages of grief. Understanding why you're suffering can help, as can talking to others and trying to resolve issues that cause significant emotional pain.

Mourning is the expression of *grief*, occurring as a result of someone's death. It is a personal and a collective response which can vary depending on the contexts of the relationships we have.

Ceremony is a unified ritualistic event with a purpose, usually consisting of a number of human expressions such as music, spoken word, poetry, or other artistic components. The purpose of a funeral ceremony is for those who are experiencing grief to come together in a meaningful way that allows for the expression of our grief. Every ceremony is as unique as the individual whose life we are celebrating. Some ceremonies may have rich traditions that incorporate religious or spiritual elements. Other ceremonies may be very simple and only have a few components. *The important thing is that grief shared is grief diminished* and ceremony's that allow for people to mourn together can greatly support our path to acceptance.
